

for **GLASS-FIBRE REINFOCED CONCRETE** manufacturing

AUSTRA

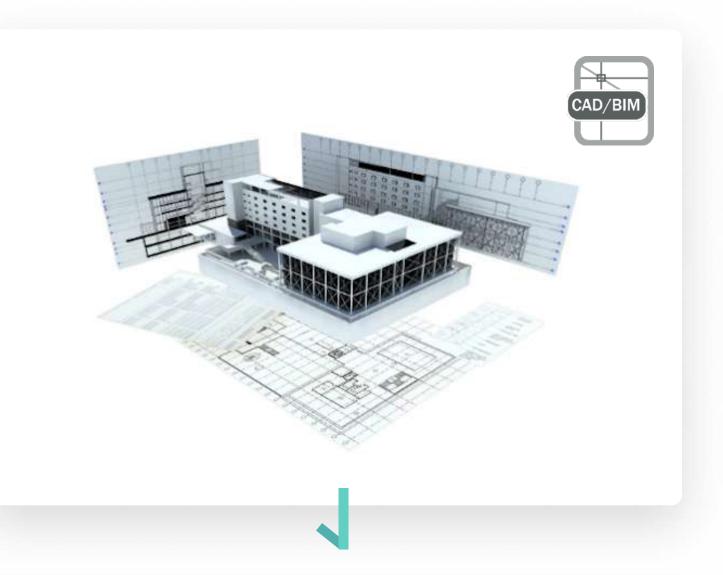

Austra

A modern and comprehensive platform for industrial businesses - it excels at industry-specific functional areas where most general-purpose solutions under-deliver

BIM/CAD integration

AUSTRA

Integration with CAD/BIM platforms

Automatic API or template element information upload

Upload information validation - new, updated elements, versioning, etc.

Drawing file upload and storage

Automation of BOM, production time norms

Process automation

Automated production planning and scheduling

Multi-factor scheduling algorithms (time norms, delivery dates, warehouse statuses)

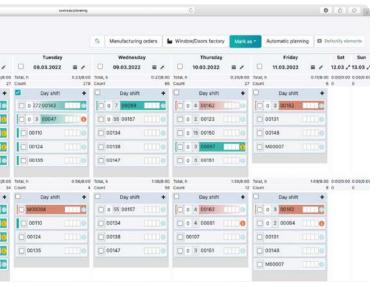

Automated material write-offs, employee salary calculations, and more

Mold optimization

Optimization can be run with or without time limitation (project deadline)

Determine how many molds are needed to manufacture elements

Determine mold resizing plan
